

Section 1 - Meta information

Team: Erik, Einar, Lasse, Sondre

Sprint number: 2

Schedule: March 11th - March 31th

Section 2 – Sprint planning note

2.1. Sprint goals

Sprints 1-2 covered all aspects of the website content, and so the last step is to code it. Sprint 3 will involve creating the website using HTML, CSS, and potentially some Javascript.

2.2. Definition of done

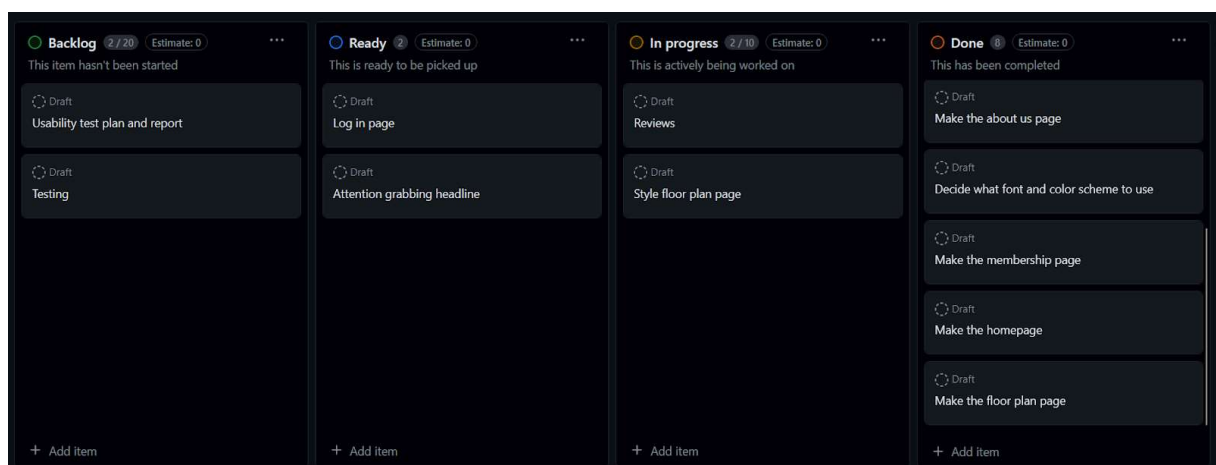

The website is finished and working to a degree where we are able to ship it to the end users.

All of the content we planned is working on the website, on different devices and platforms.

2.3. Sprint backlog items

Item Id	Item description	Size Estimation	Customer value
U01	As a user I want to see the different types of amenities and facilities on the website	8	High
U02	As a company or student, I want to find the pricing for the different membership plans and an easy way to sign up for or cancel the services.	20	High
U03	As a customer, it is very important to be able to access the website on different devices in an effective way.	15	Low
U04	As a user, I want to know the contact information for the offices, to ask questions about the service.	5	High
U05	As a user I want to find the location of the office with a map, and how to get there.	5	Medium
U06	As a user I want to know how secure my information and data is with this company and how it is used	8	Medium

2.4. Kanban management board

Section 3 – Sprint Review note

3.1. Reflective summary

Participants: Lasse, Erik, Einar, Sondre

Meeting duration, location: 1 hour, digital meeting

Summary:

We finished the third prototype which includes the four pages we wanted. These are the landing, membership, floorplan and about us pages.

Demonstration result: Four of the website pages are up and working

Item Id	Item description	Size Estimation	Status	Demo
U01	As a user I want to see the different types of amenities and facilities on the website	8	High	Yes
U02	As a company or student, I want to find the pricing for the different membership plans and an easy way to sign up for or cancel the services.	20	High	Yes
U03	As a customer, it is very important to be able to access the website on	15	Low	Yes

	different devices in an effective way.			
U04	As a user, I want to know the contact information for the offices, to ask questions about the service.	5	High	Yes
U05	As a user I want to find the location of the office with a map, and how to get there.	5	Medium	No
U06	As a user I want to know how secure my information and data is with this company and how it is used	8	Medium	No

3.2. Customer feedback

Pros:

- Page layout was good and easy to read
- Straightforward navigation

Cons:

- Website not scalable to mobile view
- Pictures on floor plan were low res and have watermarks

- Lack of feedback when user registers/logs in
- Extra scroll bars on about us
- Register page too wide in comparison to login page
- Lack of locations. Need address and picture on map

Section 4 - Retrospective meeting note

Participants: Lasse, Erik, Einar, Sondre

Meeting duration, location: 1 hour, digital meeting

- Start doing:
 - More meetings, staying ahead of schedule - we ended up doing everything last minute and rushing
 - Use own branches instead of everyone working on main branch
- Stop doing:
 - Committing directly to the main branch: This causes merge conflicts which use up time
 - Getting sidetracked: This wastes time, and we should rather take breaks to do this
 - Overlooking mobile development: Not all pages work in mobile format

- Continue doing
 - Helping each other and collaborating to find solutions
 - Working together to make decisions that affect all pages
